Human Wikipedia

February 20th, 2019 - In common usage the word human generally refers to the only extant species of the genus *Homo*—anatomically and behaviorally modern *Homo sapiens*. In scientific terms the meanings of hominid and hominin have changed during the recent decades with advances in the discovery and study of the fossil ancestors of modern humans. The previously clear boundary between humans and apes has

Human evolution Wikipedia

February 18th, 2019 - Human evolution is the evolutionary process that led to the emergence of anatomically modern humans beginning with the evolutionary history of primates—in particular genus *Homo*—and leading to the emergence of *Homo sapiens* as a distinct species of the hominid family the great apes. This process involved the gradual development of traits such as human bipedalism and language as well as

Human BioDiversity Reading List

HBD

February 18th, 2019 - Someone recently said. Assertions about the importance of HBD human biodiversity are rife on the internet among high IQ bloggers. We thus created the following bibliography to aid those interested in human biodiversity.

Richard Brautigan gt Tokyo Montana Express

February 17th, 2019 - Brautigan gt The Tokyo Montana Express. This node of the American Dust website formerly Brautigan Bibliography and Archive provides comprehensive information about Richard Brautigan's novel *The Tokyo Montana Express*. Published in 1980, this was Brautigan's ninth
